series

CNC All AC Servo Bender

Ideal for companies striving to build clean and efficient factories!

Upgrade your company's efficiency with our enhanced standard series, now featuring a fully electric servo motor in place of traditional hydraulic equipment. Available as an option for the KBC, BNC, and BNM series, we proudly offer models up to size 80 across Japan.

Hydraulic-Free Benefits:

eco-friendly

No hydraulic oil required—eco-friendly and sustainable!

worker-friendly

Quiet operation—creating a more comfortable work environment!

business-friendly

Reduced power consumption—cost-effective and easy to manage!

Series Concepts

- Eliminates hydraulic oil, reducing environmental impact and oil pollution in your factory!
- Synchronized control enhances machine performance and improves takt time!
- Lower power consumption (kWh) significantly cuts running costs!
- Hydraulic free unit ensures the machine operates more quietly, reducing operator stress!
- Numerical control of pressure die positions streamlines setup changes, saving time and effort!
- Optional air cylinder replacement for part of the drive source available for added flexibility.
